USER STORY TITLE	USER STORY
Remote Control of Air Conditioning	As a User, I want to start/stop my engine remotely so that I can warm up my car during winter or cool it down during summer before getting in
Remote Control of Entertainment system	As a User, I want to remotely control my in-car entertainment system so that I can set up my music playlist before I start my trip.
Automatic Vehicle Lock	As a User, I want to my car to automatically lock itself when I move 5 meters away from it so that I don't have to worry about securing the vehicle while my hands are occupied
Basic Real-Time Traffic Updates	As a User, I want to receive basic real-time traffic updates so that I can adjust my routes to avoid heavy traffic or road accidents
Engine Performance	As a User, I want to have the system monitor my engine performance so that I can get alerts about potential issues for preventive servicing
Battery Life Monitoring	As a User, I want to have the system track my battery health so that I can be alerted about necessary charges or replacements
Parked Car Locator	As a User, I want to have the system help me locate my parked car so that I cannot waste time looking for it in large parking lots
Transmission System Monitoring	As a User, I want to have the system monitor my transmission system so that I can be alerted about any potential issues
Autonomous parking maneuver	As a User, I want my car to have an automatic parking feature so that I can easily auto park in tight spots without driver's intervention to avoid possible damage.
Tire Pressure Monitoring	As a User, I want to have the system monitor my tire pressure so that I can maintain optimal tire pressure for safe driving and fuel efficiency
Integration with Smart Home Devices	As a User, I want to have the system integrate with my smart home devices so that I can control car features via those devices for increased convenience
Traffic Data Display	As a User, I want to get advanced real-time traffic updates with alternative routes and estimated arrival times so that I can make informed decisions about the fastest and most effective routes to take
Remote Vehicle Control	As a User, I want to be able to remotely lock and unlock my car so that I can ensure its safety even when I am away
Remote Control Security	As a user, I want to ensure that the remote control of my vehicle is secure, so that unauthorized persons cannot control my vehicle remotely
Brake System	As a User, I want to have the system keep tabs on my brake system so that I can be alerted when there is a need for its inspection or repair
Route Suggestion Logic	As a user, I want the system to suggest alternate routes based on real-time traffic data, so that I can reach my destination faster and avoid traffic congestion
